ANNUAL GREETING.

"May seed-time leave your doubts no room,
The summer find your fields a-bloom.
The harvest, as 'tis gathered in,
Crowd every barn, and every bin."

KIND FRIENDS:—In sending you my SEED CATALOGUE for 1890, I take this opportunity of thanking you for the liberal patronage bestowed on me, and for the many kind letters and testimonials, in regard to the good quality of my seeds. I am happy to say I do not know that I have a single dissatisfied customer; but if there should be any such, if they will write to me, I will do my best to render satisfaction. I do not boast of having the largest seed house in the country, or of issuing the most magnificent Catalogue, filled with illustrated beauty, and bewitching rhetoric, (which all understand the customer really has to pay for in high-priced seeds.) But rather, I am glad to say that that which I do, I mean to do well, and by personally growing most of the seeds, carefully testing them, and putting them up myself I KNOW WHAT I AM SELLING; and am able to supply good-sized packets at a reasonable price.

My business the past season has been more than that of any previous year; and I find people fully understand the great advantage of buying tested seeds direct from the grower. I now have a very large and carefully selected stock of seeds to offer. To strangers, I would say—

YOU WILL NOT FIND IN MY CATALOGUE

"store seed" venerable with years, and greater travellers than Stanley; seed saved from the odds and ends of various crops; seed saved from unsalable melons, and onions; headless cabbages, sprangling carrots; refuse corn, beets, and vegetables of all sorts. But if you want Northern seed, honestly raised, home grown, carefully tested: seed warranted to give satisfaction (or order re-filled gratis), then I should be pleased to count you among my customers for 1890.

Printed by A. T. COOK, Clinton Hollow, N. Y.
**PLEASE REMEMBER**

My seeds are raised for My Customers.

Terms. strictly cash with the order.

I send no seeds on credit, or commission.

Postage-stamps taken same as cash.

[Canada Stamps or Bills taken.]

Money—Order office, Poughkeepsie, N. Y.

I put in extra packets with every order.

Everything in this Catalogue carefully packed and sent by mail prepaid, at prices given.

I guarantee entire satisfaction in everything I offer, in so far that, should any prove otherwise, I will refill the order gratis.

---

**HOW TO SEND MONEY.**

Although letters sent in the usual way very seldom get lost, it is, perhaps, best,—when $1.00 or more is enclosed, to send by one of the following methods, (which may be done at my risk.)

Registered Letter;

Post-Office Order (payable at Poughkeepsie, N. Y.) Bank Draft, or

by Express-order. I always put in more than enough extra packets to pay this expense.

I GUARANTEE that all seeds sent out by me, shall reach their destination in good condition, and will replace any that may be lost or injured on the way:—thus I warrant everything but the crop, and take the purchase of seed the safest investment possible.

ORDER EARLY. Please send your orders early as possible, before the rush, while my stock is complete: I will have made time to add extra packets, and will have the seeds on hand just when you want them. Should you receive more than one of my Catalogues, or Circulars, please hand to some friend, and thus do both them and me a favor.

WHAT I PROPOSE TO DO. 1st. To furnish my customers the very best seeds at a reasonable price. 2d. To furnish large size, well filled packets. 3d. To fill all orders promptly.

PARTICULAR ATTENTION. If any of my customers the last season purchased seeds of me that did not give entire satisfaction, it will kindly mention it when ordering this season, I will be pleased to give them anything they wish of equal value.

---

**A T. COOK. Clinton Hollow, Dutchess Co. N. Y.**

**A FEW TESTIMONIALS.**

The Editor of the excellent "FARMER'S MAGAZINE and RURAL GUIDE" Parkesburg Pa. April 5th. 1885 writes:—Altho we have an opportunity of getting our seeds elsewhere; we have tested yours for several seasons and like them too well to give them up.

Seward Plant, Economy, Ind. March 25th. 1885, writes:—Friend A. T. COOK. We have used thy seeds for some four or five years and will say that we never dealt with any seed-man that sent out such good seed, so neatly packed, and in such liberal quantity.

S. C. GIFFORD, Brooklyn, N. Y. writes:—Seeds all came in good time and splendid condition. Accept thanks. I was greatly surprised and pleased at the quantity and quality of the same. Your generosity and promptness, exceed any I have ever dealt with, and I shall freely use my influence among my friends in your behalf.

H. A. McGUISTON, Fair Haven, Ohio. May 30th. 1885, writes:—The last three years I have planted Cook's seeds alone; I am quite satisfied with those of our most reliable seedsmen such as * * * and many others; and Cook's always come out ahead. I have watched it closely and it has surprised me greatly: the different kinds of Wall, Walnut &c. seed.

WILLIAM STEELE, Bathgate, Dak. Feb. 24th. 1886. writes:—We are glad to send in a small order for seeds, as we got such good satisfaction in everything we get from you, and have equally recommended them to our friends; thanks for extra packets sent.

K. MAARTMAN, Park River, Dak. Feb. 7th. 1889. writes:—I can recommend your seed very highly. Last spring I had seed from you, Mrs. Metz and Dak—but none of them gave such good satisfaction as yours. All of yours done nicely. I was the only one in the town that grew any cabbages. I raised two fine heads from one packet of your seed.

"Whatsoever a man soweth, that shall he also reap."
Specialties, Novelties, and Improved Varieties.

The following list of Specialties, new, and improved varieties of Vegetable seeds, etc., have been mostly grown, and fully tested by me, and found to be worthy of all the praise I have given them; and my customers will find them all of great value and merit.

"The most desirable climber in cultivation."

THE CINNAMON VINE.

A beautiful climber, which possesses the rare quality of emitting from its flowers the delightful odor of cinnamon, and very appropriately called the "Cinnamon Vine." Perfectly hardy, the stem dying down every autumn, but growing again so rapidly in the spring as to completely cover any trellis or arbor very early in the season. It is as easily cultivated as the Madeira Vine, has no insect enemies, and is not affected by drouth. It is propagated from roots or tubers which will make from ten to twenty feet of vine, and with its beautiful heart-shaped leaves, bright green peculiar foliage, and clusters of delicate white flowers, sending forth a delicious cinnamon odor, render it by far one of the most desirable climbers in cultivation. Planted near a door or window, and the vine trained over and about it makes an ornament worthy the admiration of all. The tubers are frequently over two feet long at two or three years of age, and run straight down in good deep soil—fresh whiter than superfine flour, and equally as good for table use as the best potatoes.

J. P. RUNG, Tyrone, Pa., says—The vine has grown about eighteen feet, and was very full of bloom, with a delicious odor, scented the air for a long distance. The foliage is very much admired.

JAS. E. BOLDJER, Jr., St. Joseph, Mo., says—The Cinnamon Vine is a success. From one stem a dozen branches have started, ranging from twelve to twenty feet each, and blooming profusely; very fragrant. We are more than satisfied.

Miss EMMA A. FIELD, of Elyria, O., writes—It is a beautiful vine of rapid growth, beautiful foliage, and a perfume that is perfect.

Mrs. A. MUNDT, of Fairbury, Ill., says—The vine is very pretty, and pleasing with its bright green and peculiar foliage. I transplanted the roots from a smaller to a larger pot, and was surprised to find the three roots, which were about the size of a lead pencil and half as long, had increased to six roots from one to one and a half inches in diameter, and about eight inches long. Three of these roots, each with one shoot, I trimmed all the rest off, completely fill one of my windows, eight feet long and three feet wide. I intend to try some of them out doors next year.

S. WILSON, Mechanisville, Pa., Nov. 27th, 1889, writes—We think the Cinnamon Vine is one of the most desirable house plants for winter; it blooms as freely in the house as out doors, and they can be trained over and around a window, and will fill a room with a delightful fragrance in the cold and dreary winter months.——

PRICES OF THE CINNAMON VINE.

I have been fortunate the past season in growing an enormous stock of these splendid vines, and will make them a "leader" this year—selling them at less than half the usual prices. It is not probable that they can be obtained at such low figures again.

I will send three nice roots or tubers by mail post-paid for 30 cents: six roots for 50 cents, or thirteen roots for $1.00, no order filled for less than 3 roots. I pack them well in strong paper boxes, and guarantee them to reach their destination in good condition.

CLUB-AGENTS WANTED. I want an agent at every Postoffice in the United States and Canada to get up clubs for this charming vine. I give useful premiums or a cash commission. My terms are liberal: any live person, [even boys and girls] can make money rapidly, or secure desirable premiums with but little effort; as every lady in the country who has a taste for the beautiful, will not only be willing but glad of the chance to obtain such a hardy, some climber especially when it is offered at such a reasonable price. Full particulars. Premium List, etc., sent free.
NEW BANANA MUSK-MELON.

This new variety originated with one of our best growers in South Jersey, and is pronounced by him the most profitable variety he has ever grown. He realized an average of forty cents each for his entire crop, as they were eagerly sought after in the Philadelphia markets, on account of their great oddity of shape and appearance. They grow from 20 inches to 2 feet long, preferred to any other variety, and a great curiosity.

IMPROVED PURPLE-TOP YELLOW RUTA-BAGA.

This variety cannot be too highly recommended, and no sort will produce such handsomely-formed roots, or greater yield. It is extra fine quality, very solid, of a beautiful orange color, with a handsom purple top. It is the result of many years of careful selection. Pkt. 5 cts.

HUBBARD SQUASH.

Too well known to need comment. The standard winter squash: excellent for table use, of good size, dry, fine-grained flesh, a good keeper. This squash is doubtless, more largely than any other. Pkt 5c. oz. 16c. 4 ozs. 50 cts.

HUNGARIAN HONEY WATERMELON.

This new variety is the richest and sweetest I have ever tasted. Flesh bright red, solid, very crisp, and sugary; they ripen exceedingly early, are very productive, and grow of uniform size. Pkt 10c. 8 for 50c.

NEW DWARF CHAMPION TOMATO.

Introduced by W. C. Beckert, originator of the charters radish,—who describes it as follows: “In this new variety we have a tomato that is entirely different; it is dwarf and compact in habit, and can be planted as close as three feet. In a comparative test with leading varieties it has proven itself remarkably early; ripening its fruit as early as July 1st. It is an immense cropper, and will yield double the quantity of extra early fruit per acre, than can be obtained from any other tomato. Price 5c. per pkt. oz. 25c.

A. J. CALVER, Mt. Lebanon, N. Y. Sept. 11th, 1889. writer—• • • I am so pleased with the small preserving tomatoes grown from your mixed seed, that I thought to drop you a line. Some of the varieties are quite new to us, the red and yellow plum, and the pear are particularly nice and prolific growers. Your modest little circular is really a treat amidst the flurrying array of guides. Catalogues, and when I want seeds I shall send to you.

TELEPHONE PEA.

This new variety is immensely productive, of the finest quality and excellent sugary flavor. vine very strong; pods are of large size, and closely picked with large delicious peas. Pkt. 10c. pint. 25c. qt. 45 cts.

MIXED FLOWER SEEDS.

The introduction of these has proved a most marked success; they are a mixture of over 200 varieties of Hardy Flower Seeds, and it carefully sown and cared for, will produce an astonishing variety of flowers. No one who has not seen such a bed can form an idea of its possibilities; the different seasons of bloom insuring something new almost every day.

Per packet 15 cents. 2 for 25c. 5 for 50c.

CHRISTMAS WATERMELON. A most valuable, new and distinct variety. They have been kept in a cool cellar for over four months, and cut fresh and delicious. Their valuable keeping and shipping qualities are due to a peculiar, hard tannic acid coating of enamelling of the skin, which also gives them an exceedingly handsome and fresh appearance. The flesh is rich scarlet, very solid, and of delicious sugary flavor. Packet 10c. 3 for 25c.

EARLY WINNINGSTADT.

A well known and very popular variety, heads large, decidedly conical, remarkably solid and hard, even in summer. This is a sure header, a good shipper, and suffers less from the cabbage worm than any other sort, valuable for both summer or winter use. Market gardeners and all others desiring a choice strain of this desirable cabbage should try my selected seed. Pkt. 5 cts. oz. 20c. ½ lb. 50c. 1 lb. $1.75.
POTATO SEED—I offer A VERY CHOICE STRAIN OF Potato seed, one that will produce a great variety of kinds; some of which may prove of inestimable value. Packet 10 cts. 3 for 25 cts.

Jesse Green, DAYTTON, I11. July 23rd, 1888, writes:—Mr. A. T. Cook, I address you relative to some seedling potatoes raised from your seed. Out of 30 varieties I selected the earlist and best, and planted them at same time, and in same field, with Early Ohio, Early Rose, and Beauty of Hebron. They have been from one to two weeks ahead of all these kinds, and are now fully ripe, while the others are still green. They are very productive; we produced the best eating potato we have. I think I will have 200 bu.

Wm. M. Johnson, of Tampa Ind. writes:—"The packet of potato seed was received. Some look like the peach-blow,—some are a beautiful pale pink, large and long for a seedling the first year, they are a beauty. Some large white, purple eyes,—some round, pale red, 30 to 50 in a hill,—pale blue,—some white, flat, and three inches or more long,—two hills of black potatoes, &c. &c.

I never saw so many different colors and shapes. If they grow in the same ratio another year, they will be the largest ever raised in this section."

PURPLE HUSK-TOMATO. This new, and beautiful variety produces fruit in great abundance, from one to two inches in diameter, enveloped with a husk. In sections of excellent fruit, we are inclined to rate it highly; a great curiosity. Pkt. 10 cts. 3 for 25 cts.

GARDEN DOCK.—This rare, distinct, and valuable variety, grows to a gigantic size; (I have measured leaves, 4 feet 1 inches long, by 10 inches wide.) It is rich and tender, and exceedingly fine flavored. This is by far the earliest of all greens, being ready for the table fully two weeks before asparagus; and considered by many much superior to that popular vegetable. A bed once started, will last for years. Every one should grow it. Pkt. 10 cts. 3 for 25 cts.

NEW PEACH TOMATO. It is difficult to decide from its appearance whether it is a Peach or a Tomato. It is smaller to many peaches not only in size, but shape, color, and general appearance, seeming to have the very bloom of the peach upon its surface. Its equal in delicacy of flavor does not exist in the Tomato family. For exhibition purposes it is very desirable. I recommend it as a variety which will please my custome very much. Pkt. 10 cts. 3 for 25 cts.

COOK'S IMPROVED LIMA.—Best Lima Bean grown, either for home use or market, very productive. 23 to 70 days to two weeks earlier than Brear's Improved. Pkt. 10 cts. 3 for 25 cts.

IMPROVED CUSHAW SQUASH.—This is the genuine Cushaw of "ye olden time," and is a great favorite on account of its many good qualities. The flesh is a rich yellow color, solid, fine grained, very sweet and excellent for pies, and equally good for baking. Pkt. 10 cts. 3 for 25 cts.

WHITE PLUMECELERY. This is one of the best of the so called Self Blanching varieties, as it needs but little banking up. Its eating qualities are equal to the best of the older sorts, being crisp solid, and of a pleasing nutty flavor, while its white feather-like foliage places it ahead of all others as a table ornament. Pkt. 10 cts. 3 for 25 cts.

Mrs. Gilman Stearns, Machias, Maine, Feb. 5th, 1887, writes:—I planted the collector's celery seed, and planted them, the result was far better than I expected; I never sowed any seeds before that I thought more came up than I planted. My Celery surpassed any that I ever saw, it was very crisp, and of exquisite flavor; I never saw anything like it when I lived in the City.—I neglected to send you for seeds in 1886, and both you and me here: I had three papers of Celery seed, and all failed, and other seeds were the same; (and my neighbors had the same tricks that I had.) Now for 1887 I will try your seeds again, for every seed of yours came up.
GENERAL LIST OF

Vegetable, and Flower Seeds.

I have taken much pains to give a select list of only the best varieties, rather than a bewildering long one. I hope every one who has not planted my seeds, will give me at least a trial order. [And then you will receive my Catalogue next year without writing for it.]

LIBERAL DISCOUNTS.—As an inducement for the formation of clubs, or to market gardeners and those who order larger quantities than usual for their own use, I make the following LIBERAL DISCOUNTS ON SEEDS IN PACKETS,

<table>
<thead>
<tr>
<th>Persons sending</th>
<th>$  .50 may select</th>
<th>seeds in packets only, amounting to</th>
</tr>
</thead>

$ Prices for larger quantities, given on application.

SWEET CORN.—Cook's Extra Early. The

THE BEST, and earliest sweet corn grown: ears 6 to 8 inches long; very productive, and sweet.
" Especially valuable for the market-gardener, to

completely control the early markets. Pkt. 10 cts.

SUGAR TROUGH GOURD. These Gourds

are very useful for many household purposes, such

as buckets, baskets, nest-boxes, soap and

salt dishes, and for storing the Winter's

lard. They grow to

hold from 4 to 10 gal-

lons each, have thick

hard shells; very light,

but durable, having been

kept in use as long as

10 years. Pkt. 10 cts., 3 for 25 cts.

GOLDEN QUEEN TOMATO.
A real good yellow

sort of first class qual-

ity. It is solid, very

smooth, free from

ridges, large in size, ripe early, and is by far the

most beautiful yellow variety ever sent out. None

is better for preserving or slicing; the handsome,

golden yellow slices make a beautiful contrast in a

dish with red tomatoes. It has very little acid.

Pkt. 10 cts., 3 for 25 cts.

MAMMOTH SUGAR Corn. The largest cared, and

one of the sweetest known: ears weighing from 2 to 3

pounds each; it remains in season a long time. Your

garden will be incomplete without this splendid late

STRAWBERRY TOMATO.—I am headquar-

ters for the genuine Strawberry Tomato, [Winter, or

Ground Cherry,] seed. This distinct husk tomato, is

unequalled for canning, preserving, and pies. Dried

in sugar, as Raisins, or Figs,—or to use in fruit cake. They

are unexcelled. They are a handsome golden

color,—the size of large cherries, enormously produc-
tive, and will keep (if left in husks) all winter. They

have a strawberry flavor, and many esteem them

tasty equal to that fruit to eat out of hand. This to-
mato is indispensable where fruit is scarce, or likely
to fail. Extra selected seed, Pkt. 10 cts. 3 for 25 cts.
POP CORN.—Cook’s improved Egyptian. I have been improving this corn, for many years, and now offer a strain of seed that cannot be surpassed. It pops splendid, bursting out very large, white as snow; tender, and delicious. Every one who keeps poultry, should raise a supply for feeding chickens, nothing can be better. Boys and Girls, as well as older ones, can get a nice income growing this corn to sell; it sells readily at from $1.50 to $3.00 per bushel of ears. I send out only EXTRA SELECTED seed. Pkt. 10 cts. 3 for 25 cts. quart. 60 cents.

COLORADO PRESERVING MELON.

This is quite distinct from the ordinary preserving citron, the seeds being of a light green color. It is immensely productive; one vine produced 25 fine melons, weighing from 10 to 30 pounds each. The flesh is very firm and solid, with few seeds, and makes beautiful, clear, transparent preserves of surpassing fine flavor. pkt 10 c. 3 for 25 cts.

PERFECT GEM SQUASH.

The Gem squashes are from 4 to 6 inches in diameter, of a light straw color, slightly ribbed, and have a thin smooth skin; very productive — 24 squashes having been grown on a single vine. It is an excellent keeper. The flesh is unusually sweet, dry and fine-grained when cooked, and I consider them the best squash in cultivation. Pkt. 5 cts.

YELLOW DANVERS ONION.

ROSY GEM RADISH. This new Radish has won golden opinions in all sections of the country. The illustration is perfect from nature, and gives some idea of their great beauty. It is absolutely the earliest radish in cultivation; their shape is perfectly globular, with rich deep-scarlet top, equally desirable for either the market or home garden, and should be planted by everybody. Pkt. 10 cts. ounce 20 cts.

EARLY PADILLA CAULIFLOWER.

A new variety thoroughly tested in all sections of the country. It proves EARLIER, LARGER, AND MORE SURE TO HEAD than any other sort ever introduced. I have put the price very low for so valuable a variety. Pkt. 20 cts. 3 for 50 cts.

PEPPER. Golden Dawn Mango. The earliest, sweetest, handsomest and most productive pepper grown; entirely free from fiery flavor. For beauty of growth this pepper is worthy of a place in the flower garden; my plants averaged 15 full-grown mangoes each. Pkt. 5 cts.

*DO NOT FAIL TO READ "MISCELLANEOUS SEEDS, ROOTS, ETC." ALL ARE VALUABLE.*
VEGETABLE PEACH. This unique Novelty, first introduced by me, is one of the most beautiful vegetables grown. They grow on vines same as melons, are a beautiful golden yellow, almost exactly resembling oranges in color, shape, and size. The flesh is snow-white, and makes most excellent and handsome preserves. Fried as Egg Plant, when green they are delicious, and for "Mangoes," they are so perfectly adapted I know of nothing better. They will keep in good condition two months after being picked from the vines. Very productive, early, and hardy.—have ripened their fruit in Canada.—planted in June. I hope no one will fail to try this novelty. I have never grown anything in my gardens that called forth so much interest and admiration. Directions for growing, use of fruit, etc., on each packet. Packet, 10 cts. 3 for 25 cts. 7 for 50 cts.

EARLY JERSEY WAKEFIELD. This is preeminently the best extra early cabbage in the world; heads of medium size, hard and solid; can be planted close, and is very desirable for early market.

TRADe MARK

Gardeners! plant them this year and you will agree with the verdict that "they are the best in the world." All varieties of cabbage seed are 5 cts. per pkt. 30 c. per ounce. 4 ozs. 50 c. per pound $1.75, postpaid.

J. T. DUBBERLY, Surrey, Ga. write—I have tried your seeds, and am well pleased with them. They ALL grow, and I get more seeds for the money than from other dealers.

NEW JAPANESE BUCKWHEAT. It is seldom that such a sterling novelty as this is placed before the agricultural community. It is quite distinct, fully two weeks earlier,—the kernels are twice the size, and yields twice as great as other varieties. It makes a very superior flour. It meets with the highest commendation everywhere and must soon displace all others,—large pt. 10 cts. b. 25 cts., 3 lbs. 60 cts. postpaid.

THE MOST DELICIOUS OF ALL MELONS. I offer this season, "THE PRINCESS" a new Musk-melon of extraordinary value, which after a thorough trial for the past two seasons, has proven the best and richest in flavor of over forty varieties. My engraving, made from nature, shows their shape, which is nearly round, with heavily netted dark green skin; the flesh is of a rich salmon color, thicker than in any other melon, and in flavor is SWEET AND LUSCIOUS BEYOND DESCRIPTION. They ripen early, and grow to good size, frequently weighing eight to ten pounds each. The vines grow vigorously and are very productive, often producing six to eight perfect melons on a single vine. Pkt. 10 cts. 3 for 25 cts.; oz., 50 cts.

C. M. GOODSPeed, Proprietor of American Club List, and dealer in Italian Queens and Bees, Thorn Hill, N. Y. Oct. 1887, writes—Your seeds have proved so far ahead of anything we have had, I should like to place them before my patrons in some shape. * * " My wife insists on using your seeds in the future. You are at liberty to use my name.
NEW CHARITERS RADISH.
This valuable introduction, is far superior to any variety now in cultivation. In quality and flavor unsurpassed, early handsome, unusually crisp, tender and juicy; and remains good a long time without running up to seed. Pkt. 5 c.

POWELL’S PROLIFIC POLE BEAN.
This wonderful and extraordinary new variety, [first introduced by me,] surpasses by far, anything ever before seen among beans; I do not claim to much when I say they are fully TWICE AS PRODUCTIVE as any other variety in existence. They are a sight worth seeing; almost a solid mass of pods from the bottom to top of the pole. I only regret I have no illustration that will give any idea of their productiveness. The handsome green pods are late in opening average 8 or 9 beans to the pod, grow very uniform, about 6 inches long; perfectly stringless, very thick meated, tender, rich and buttery; possess an exquisite flavor when cooked, and retain their superb qualities until nearly ripe. My supply of seed of this bean is so limited, and the demand for it so great, that I can only offer it in packets. I make the price so low that all can give it a trial. Pkt. 10 cts. 3 for 25 cts. 7 for 50 cts.

AMY THOMPSON, Pine Grove, Ohio, Oct. 23d, writes—I raised 1,900 Powell's Prolific beans on ONE VINE: which was the greatest yield I ever saw.

Mrs. C. E. Lissford, Kinards, S. C. Nov. 9th, writes—I actually can't tell by count, how many beans grew on one stalk of the Powell's Prolific but from five vines we ate beans all the summer, and then gathered over one-half gallon of seed. They were the admiration of the neighborhood; I have picked a full mess of beans for dinner, without changing position at the vine. Our summer was dry—but the vines continued green and bearing, while all other kinds of beans dried up, they are the best beans I ever saw grow, and I cannot command words to express the true value of such a garden treasure.

PEAS— Bliss' American Wonder true seed. Best in quality. Immensely productive. I have counted 25 large pods on one vine. Height 10 to 12 inches. Earliest and sweetest wrinkled peas in cultivation and have met with the unqualified approval of all who have grown it. Pkt. 10 cts. Pint 25 cts. Quart 45 cents.

PREMIUM FLAT DUTCH CABBAGE.
This variety is more largely grown than any other for late or main crop. Heads large, round, solid, broad and flat on top: or very thin variety. The seed has been long and carefully selected, and I think I am very modest in my claim that I believe it is excelled by stock offered by any other house in the world. Packet 5 c. ounce 20 c. 1/4 lb. 50 c. pound $1.75.

IMPROVED EVERGREEN SUGAR CORN.
This is an early Evergreen coming immediately after the early sorts, and before the mammoth sugar, it is very productive, has large well filled ears, and small cob; very sweet, and sells higher in market than most other corn. Pkt. 5 cts. pint 25 c. quart 40 cts. postpaid.

EARLY GREEN CLUSTER CUCUMBER.
One of the best early varieties, growing in clusters of good size, extremely productive, and remains in Bearing condition longer than any other early sort. Pkt. 5 cts. 1/4 lb. 30 cts.

HENRY SPRING, Scottdale Ct. March, 1st. 1889, in a letter ordering seeds writes—I have used your seeds and yours only, for several years, and they are altogether more satisfactory than what I could get for twice the money at our seed store: later he writes. My seeds came in due time; two of my neighbors after seeing what I got decided to each get some: therefore I send you another order.
STACHYS VALUNBLE—prepared. cooked artichokes and melons.

TUBERS JAPANESE. 

A most distinct and valuable new sort offered last season for the first time. For the past three years the NEW GOLD COIN has been commended in all points with Stowell's Evergreen, and in sweetness and delicacy of flavor, it surpasses that old favorite. So far, it has proven ten days earlier, and in size, one-third larger. The cob is snowy white, compactly covered with large, deep grains. It is EVERGREEN to an unprecedented degree. It frequently yields three mammoth ears to a stalk.

Pkt. 15 cts. 4 for 50 cts.

GOLD COIN SUGAR CORN.

This new melon originated in Florida, the land of melons. It is extra early, extra large, enormously productive, and of most delicious flavor. All lovers of fine melons should give the New Seminole a trial.

Pkt. 16 cts. 3 for 37 cts.

SMINOLE WATERMELON.

BEANS: New Golden Prize.—Early, and very productive; pods long, brittle, and ENTIRELY STRINGLESS: of a rich golden wax color. Excellent both as a snap bean and a shell bean for winter use. The plants grow very uniform; are exceedingly hardy, and I have never known them to bolt, or rust in the least. I consider them decidedly the best dwarf bean I ever raised.

Pkt. 10 cts. Pint 35 c. qf. 45 cts.

CHUFIAS, or Earth Almonds. These very closely resemble in sweetness and richness of flavor a coconut. They are much grown in the South to fatten swine, poultry, etc. They succeed perfectly at the North: my plants yielding from three to six hundred fine chufas each. They are a rich and healthy food for poultry of all kinds. Directions for planting etc. on each packet.

Pkt. 10 cts.

STACHYS AFFINIS:—This is a peculiar and valuable vegetable, or ground-fruit recently introduced from Japan. The tubers are white as snow and produced in wonderful abundance, and are good cooked in various ways, fried, roasted, baked, etc. It prepared as egg plant they resemble it, having a pleasant spicy flavor. They are very sweet, tender and nutritious; perfectly hardy, and like parsnips or artichokes are best if left in the ground until spring.

Tubers 25c. per Doz. 3 Doz. for 60c. 5 Doz. for $1.00

CARROT. New Oxheart. This carrot comes from France, and is a decided advance in shape as shown in the illustration; it is very thick, attaining from three to four inches in diameter. It is of fine quality, and will prove of great value both in family and market gardens.

Pkt. 5 cts.

MRS. A. B. HUNTER, Caldwell, Wis., May 14th, 1889, writes:—Seeds received in good condition and I wish to thank you for your generosity and promptness. Your seeds have always been a success in every way.
THE SUMMIT.

An excellent new variety which I have now grown for two seasons with the highest satisfaction; it has proved with me, as elsewhere an enormous yielder; season medium early, tubers uniformly large, oblong, with buff skin, eyes medium and nearly even with the surface, white-fleshed and of superior flavor; vines grow strong and vigorous. It is a good keeper.

The following disinterested testimony is from the Rural New Yorker: "Summit Potato gave the largest yield of any tested on our Experimental farm last season, at the rate of 1210 bushels per acre; white-fleshed dry and meatly."

Price of POTATO EYES by mail.

For $1.00 I will send 100 strong eyes of either variety.

$2.00
$2.00
$2.00
$5.00
$10.00

I have received only the most favorable reports from all sections, from sending potato eyes. It is much the best and cheapest way to obtain new varieties. I cut the eyes from large potatoes, leaving a liberal piece of potato with each eye. One eye being sufficient for a large hill. I send them carefully boxed, and postpaid— with full directions for planting.

I am satisfied there is great loss in planting old and run-out varieties, for the potato deteriorates in a few years; many varieties are offered of no special merit. I have made the potato a careful study, growing and testing new varieties every season, and offer only such as I feel sure will give perfect satisfaction.

$10.00 WORTH OF SEEDS GIVEN AWAY.

I will give $5.00 worth of seeds—your own selection from my catalogue, to the person who will grow the largest number of pounds of potatoes (either Summit or Chas. Downing) from 100 eyes purchased of me this season; $3.00 for second largest yield; and $2.00 for third largest: all reports to be sent in by Nov., 1st.

I always send 110 eyes for 100, so you will be almost certain to have at least 100 perfect hills. I send full directions for planting and cultivating to best advantage to secure a large yield.

THE CHARLES DOWNING, is undoubtedly the coming early potato for this country: both the New York, and Ohio Experiment Stations prove them to be decidedly the earliest, handsomest, most productive, and finest table quality, of any variety yet tested by them. Reports from all growers who have planted it, are unanimous in its praise. In season, EXTRA EARLY; the N. Y. Station showing them to have matured in less number of days, than any other of the hundreds of sorts planted; and but one other marked "10" (the highest grade in table quality): its average yield is given at 375.1 bushels per acre; the popular Early Sunrise in same test is given at 197.5 bushels, and the Belle, 125.7 bushels.

It is very free from blight and rot; the color is pure white; the form is accurately shown in the above illustration, which was sketched from the potato itself. Whether baked, or boiled, its cooking qualities are faultless; its purity of color; fine floury texture, and delicious flavor being excelled by no other variety.

After growing the Chas. Downing in various soils I can fully confirm all said in its praise. I measured the yield from 100 closely planted hills,—taken just as they run, [one eye planted in the hill]—and the result—notwithstanding the poor season, was four bushels of as nice potatoes as I ever grew. I offer the Downing, with great faith in its destined popularity, and I hope every one of my customers will try it.

J. W. REMALEY, Eureka, Mich. Feb. 9, 1889, writes:—We raised two and a half bushels of splendid large C. Downing potatoes from the twenty sent me last year, and we are well pleased with them as well as all the other seeds we got from you.

JOHN GRANDY, Bathgate Dakota, writes:—I was more than pleased with your seeds; notwithstanding the extreme dry season, all grew, and each variety was true to name. The potato eyes all grew, and with no extra care and a most unfavorable season, I got from a bushel to a bushel and a half of each variety, from 50 eyes planted, and nearly all good large tubers.

A. T. COOK. CLINTON HOLLOW, DUTCHESS COUNTY, N. Y.
